Resume

2012-2013

Model at Abercrombie & Fitch. Responsibilities included maintaining the store front, folding and standardizing merchandise, keeping merchandise displays aesthetically pleasing.

2012-2014

Music Major at American River College. Studied piano performance.

2012-2015

Avid crafter and small business owner. Excelling in card-making, hand-lettering and calligraphy, metal stamping, jewelry making, floral design, event decorating.

2014-2015

Administrative Assistant Worship and Creative Arts Ministries Arcade Church. Put together and design Sunday bulletins, graphic design for church events and media, event planning and decorating.

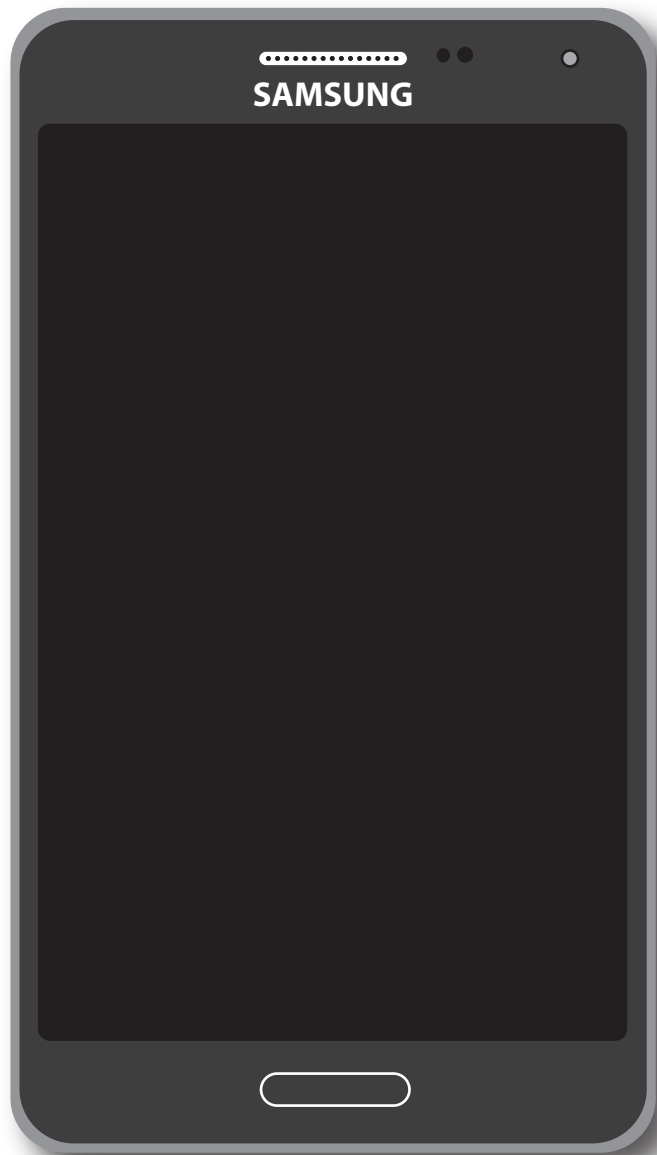

Proficient in:

- Adobe Illustrator, Photoshop, and Indesign
- IOS and Windows
- Mac and PC
- Microsoft Word and Pages

I am an aspiring designer that has a passion for graphic design, floral design, photography, jewelry making, interior design, hand-lettering, and much more. Here are a few examples of my work:

Digital Illustration

This is an illustration I made in Adobe Illustrator of the Samsung Note 3. I made this by using shapes and shadows.

Interior Design

This is a digital rendition of an interior that I created with Adobe Illustrator. I used an Analogous Color Scheme to color this image. This project utilized a lot of gradients and mesh to show lighting effects.

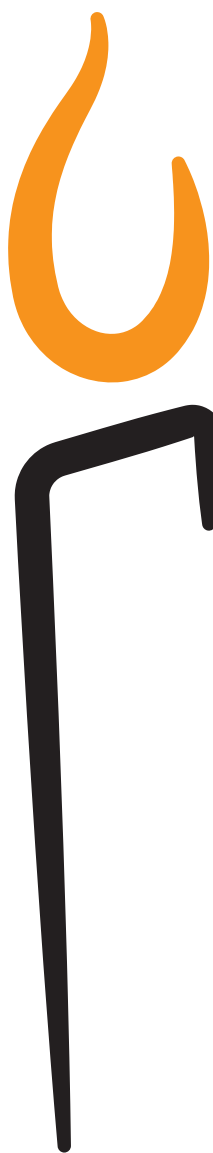

Logo Design

This is a logo that I created for a restaurant named Thai-Tanic. I also created this in Adobe Illustrator using the pen tool and free handing all the strokes. I wanted to portray a traditional Thai boat, but wanted it to have a cool, gray color scheme representing the original British Titanic.

Symbol Design

This is an illustration of a symbol that was assigned for my Art New Media 302 class in college. We were studying Gestalt Principles and this one depicts the "closure" principle. Closure is when our brain fills in the missing information in an image. This is a candle that has strokes missing, but is recognizable because our brain fills in the gaps that are needed to portray a candle. This was also made with Adobe Illustrator.

Closure

Floral Design: Centerpiece

Another one of my passions is floral design. This was a Christmas Centerpiece that I designed and arranged for my floral design class.

Floral Design: Arrangement

This design I made for the California State Floral Association Student Competition. This was a baroque inspired arrangement that I incorporated fruits into. Fortunately, it won second place in the competition.
